

WYPL is a non-commercial broadcaster here in Memphis. Our programming is news and information. In the 13 years that we have been licensed no one has filed an objection to our program content. We have never received a letter of complaint from the public. This station operates with a small staff of fewer than 10 employees with 200 volunteer announcers anchoring our broadcasts of newspapers, magazines, and books. We simply edit our broadcasts so that only authorized material may be broadcast. We use an extensive training program to train our staff and volunteers to the rules governing this operation. I estimate from a quote received from SCMS that it will cost WYPL approximately \$1,700 to purchase a computer based tracking system. I further estimate that it will require six hours to install this unit and four hours of my time to train my staff on how to use it.

Sincerely,  
Steven C. Terry  
Station Manager  
WYPL
